CATALYST® OVO™ Whole House Control

Specific Control Designed Around Your Layer Operation

CHORE-TIME®

Every. Day. PERFORMANCE.™

CATALYST® OVO™ Control for Eggs

The **Chore-Tronics® CATALYST® OVO™ Control** offers all the software features of the standard CATALYST control, along with additional features designed specifically for many types of layer houses. Gain full control of your house climate, feeding, and drinking systems with the CATALYST OVO Control from Chore-Time.

About the CATALYST OVO Control

- Up to **8 independent Light Clocks.**
- Up to **2 Light Dimmers** can be controlled by each Light Clock.
- **Neutral Pressure ExactAir™** Ventilation.
- **Outdoor Access Door** control.
- Dedicated **Nest Clock.**
- Up to **20 Egg Counters** can be connected.
- Track **Egg Collector Runtime.**
- Ability to **control Temperature** and **Humidity** in **Egg Room.**
- Track **Manure Belt Runtime.**

As with the standard control, the CATALYST® OVO™ Edition allows you to **monitor your house from anywhere** with the Chore-Tronics Mobile App.

Precise House Ventilation

Gain **All Variable Speed Control** for the Entire House. Chore-Time's CATALYST OVO has full house control for Variable Speed Fans just like the standard version. Gain precise control of your house ventilation:

- Monitor **house temperature** in sections.
- **Manage fan speeds** by individual units or in sections.
- Set **minimum vent rates** and **maximum airflow.**
- Provides a **stable house environment.**
- Keep **consistent temps** throughout the entire house.
- **Save money on energy** with precise cooling.
- Provide **more precise extra fans** during feeding.

CATALYST OVO Control Connects

CATALYST OVO Control connects to the Mobile Server via the Mobile app. Uses the same relay box, hardware, IO Board(s) and sensors as the CATALYST and CHORE-TRONICS 3 Controls.

CYNERGY READY™ for farm-to-fork data collection using CTB's CYNERGY® Data Integration (shown at right). Gain full control of your house climate, feeding, and drinking systems with the Chore-Time CATALYST Controls.

User Interface Settings Choices

- **Dark Mode** – Makes it easier to read screens in certain lighting conditions.
- **Touch Screen** – Allows for: Zoom in or out, Scroll and Swipe.
- **Alarm Status icons** – Color coded.
- **Multiple Graph screens.**
- **Time Clocks** – The Settings are displayed in a Clock format instead of a line format. All Time clocks can be set up to a maximum of 24 events.
- **Water Increment Table** – Can show hours water consumption for up to 21 days.
- **Remote PC Connection** – You have the ability to connect to the CATALYST® OVO™ via your PC that is connected to the local network. The PC connection is identical as being at the CATALYST OVO Control.
- **CATALYST OVO Updating** – Remote updating available.

Improved User Interface

- **Has all the same software features** as the CATALYST Control and CHORE-TRONICS® 3 including Multiple Variable Speed Fans.
- **Connects** to the Mobile Server via the Mobile app.
- **High resolution** 10.1 inch (257 mm) large display size.
- **Touch Screen** that works through the plastic door.
- Still designed to **easily add future functionality.**
- **USB port** for updating and mouse control.
- Outside **Ethernet port.**

We Speak Your Language

The CATALYST OVO Control comes with **multiple built-in languages** to improve communication and efficiency. Instantly switch the display text between them. More languages are always being added.

Features in all CATALYST Controls

- **Automated Updates** for software and servers when connected to the internet.
- **Access** to CATALYST systems from your phone or computer.
- **Real-time reporting** on the mobile app and online.
- **Real-time monitoring** for temperature, feed levels, drinking systems, & more.
- **New, in-depth reports** featuring updated visuals and graphs.
- **Server support tools** for debugging, troubleshooting, and more.
- **Ability to collect and monitor** key data points with the CYNERGY® Poultry Data Platform and CYNERGY Dashboard.

Support Server Tools

CATALYST OVO Control makes gathering troubleshooting information easier, along with other critical control performance information.

- **Debugging tool** – Download Debug information that allows us to support the control if an update goes wrong.
- **Service Tools** – Allows the user to download the log for troubleshooting via USB.
- **Control status information** – Information available about the status of the control.
- **Updates** – three ways to update. Update with USB, update remotely, or add update file via drag and drop.
- **Restart** CATALYST OVO Control button.
