

## Recommended Broiler Drinker Options

Flow Rate Climate	Channel Style	Catch Cup	Straight (S) or Button (B)	Birds Per Nipple	
				Start	Grow-Out
<b>Regulated Flow</b> Cool Climates Only	Standard	No	S or B	30	10 to 15
<b>Standard Flow</b> Cool to Hot Climates and Environmentally Controlled Houses	Standard	No	S or B	30	10 to 15
<b>High Flow Option</b> Hot Climates	Standard	Yes	S or B	30	10 to 15
<b>Super High Flow Option</b> Extremely Hot Climates & Houses with Minimal Ventilation	Standard	Yes	S	30	10 to 15

These recommendations are intended to be used as guidelines only. Many other factors such as ventilation; bird type, size and weight; climate conditions; etc. must be considered when choosing the correct system and flow rate. Choosing a system without considering these factors can result in poor litter conditions and poor performance. Contact your local authorized Chore-Time distributor for help in matching the best system with your individual needs.
