

MVDBS Cage System

Cages That Set The Standard

Let's grow together™

Chore-Time's Modular Vertical Dropping Board Scraper (MVDBS) System offers egg producers the outstanding production performance they expect from Chore-Time, plus greater shipping simplicity, easier assembly and repair, and improved egg roll-out – all in an economical cage system that meets current bird space standards.

Cage Features

- Cages are available in 3-high to 12-high models in cage rows up to 520 feet (160 meters) long; walkways and/or step rails are easily integrated.
- Dual floor slope improves egg roll-out, and the distance from the cage to the egg tray helps protect eggs from bird damage.
- A composite mesh floor helps lower mortality by using a tighter mesh spacing where birds stand, coupled with a more open spacing in other sections of the floor.
- Modular design features individual cages instead of eight-foot (2.4-meter) cage sections – makes cage replacement and dropping board access easier.
- Easy assembly features innovative interlocking parts, and requires fewer rings.
- Full-front horizontal cage door provides easier, more comfortable access to feed and to the cage interior.

Chore-Time's metal door latch offers true one-handed operation. Its positive lock means chickens don't get out.

- For even greater durability, cages and structural components are manufactured using all galvanized steel construction and Galfan® cage floors.*
- Mesh partitions improve ventilation.
- Floor support is simple solid rod construction. Does not require constant end-row tension.
- Chore-Time cages are quality-built in North America. Solid construction and heavy-duty materials combine with our innovative design for years of superior performance.
- System is covered by Chore-Time's generous cage warranty and solid backing. (See Chore-Time's written warranty for complete details.)

*Galfan is a registered trademark of International Lead Zinc Research Organization Corporation.

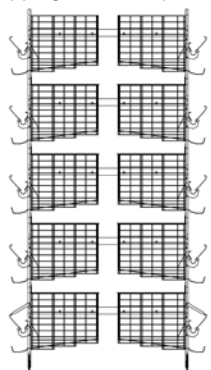

Count on Chore-Time for experience, reliability, performance and confidence.

Dropping Board Scraper

Sample 5-High Modular Vertical Dropping Board Scraper Cage

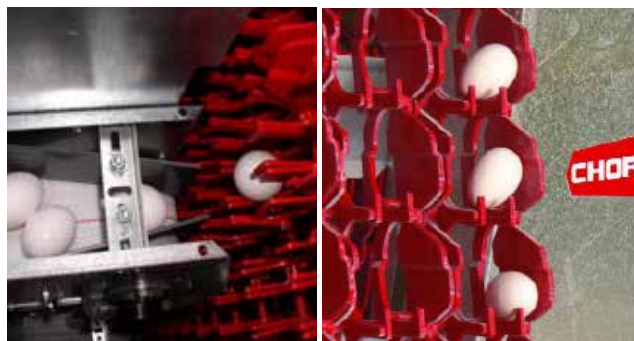

Chore-Time Modular Vertical Dropping Board Scraper Cage System Specifications For 3-High To 12-High Systems

Cage Depth	Cage Width	Floor Area	Birds per Cage	Bird Space	
				in ²	cm ²
22.34 inches 56.7 cm	24 inches 61 cm	536.16 in ² 3459 cm ²	7	76.6	494.2
			8	67.0	432.3
			9	59.6	384.5
25.34 inches 64.4 cm		608.16 in ² 3924 cm ²	8	76.0	490.3
			9	67.6	436.1
			10	60.8	392.3

ULTRA-LIFT® XL Egg Collector Features

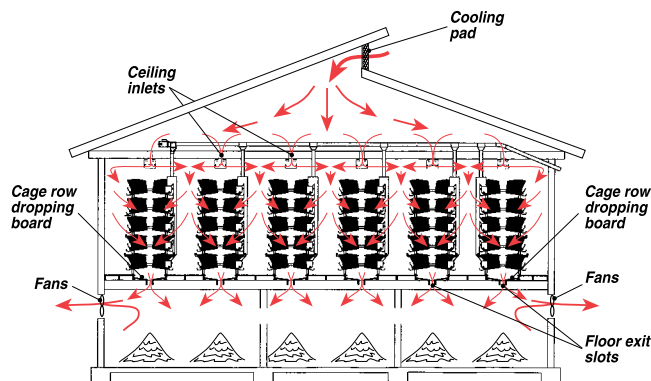

- Each cage row has its own set of egg-handling baskets.
- Individual handling minimizes egg-to-egg contact.
- Discharge heights are variable, and no timing devices are needed.
- Requires less space at the end of the cage row than other collectors.
- Eggs are transferred to cross conveyor by gravity and a unique rotation of the baskets.
- Slack belt switch automatically maintains proper egg belt tension and prevents system failure.
- Proven egg counting system is accurate to within 0.5%.

TURBO HOUSE® System

Chore-Time's TURBO HOUSE® Environmental System with dropping board scrapers offers a proven way to a better cage house environment and to greater profits. Used properly, a TURBO HOUSE® System can improve bird health, egg production, and feed conversion while lowering manure moisture content.

- Cleaner more dust-free air inside and outside the house.
- Uniform temperatures throughout the cage house.
- The System's special rolling ramp inlet automatically adjusts to weather conditions.
- Fresh air enters through house attic and is distributed evenly over birds.
- Spent air exits through slot under cages and dries manure in the pit.
- Can be used with either curtain back or dropping board cage systems.
- Ideal for the fully-enclosed houses typical of cooler climates, and provides cooling in warm climates.

TURBO HOUSE® Negative Pressure System

- Positive pressure unit keeps fans clean and efficient.
- Fans in negative pressure system are easily accessed for service and cleaning.
- Bird body weight and feed intake do not suffer from temperature variations.
- Improved egg size and production.
- Enhanced manure drying and handling and reduced odor.
- Light restriction capabilities.
