

CHORE-TIME® Control Pan Light Attracts Birds to the Control Pans

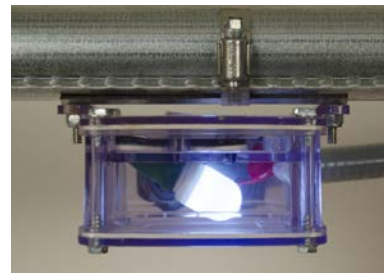

Let's grow together™

Product Features

- Bright white light helps draw birds to the control pan.
- More feed gets eaten from the control pan by increasing bird activity there.
- Encouraging a higher rate of feed consumption from the control pan helps to ensure that feed is delivered to the rest of the line.
- 220 V AC light is powered by the control pan's power unit and remains lit whenever the timer activates the feeder. (With ad lib feeding, the pan light remains lit 24 hours a day.)
- The pan light is easy to retrofit and can be mounted on any 1.75-inch (44 mm) diameter feeder line tube with 220 V AC power supply.
- Rugged, 9-watt LED bulb does not build up heat and is rated for long life without the hassle of frequently replacing burned out bulbs.
- Light kit includes all components needed for installation.

Chore-Time's Feeder Control Pan Light attracts birds to the control pan. Available for the REVOLUTION® Feeder (shown) and other Chore-Time® Feeders. Can also be retrofitted to a variety of feeding systems.
