

BROADCASTER™ Alert System

Because What You Don't Know Can Cost You!

Missing an alarm can mean big dollars with today's large poultry houses. The BROADCASTER™ Alert System from Chore-Time keeps you informed of changes in your poultry house environment. Avoid costly surprises with Chore-Time's BROADCASTER™ Alert System.

BROADCASTER™ Alert System

- Alerts you to alarm notifications and sends the alerts to your mobile phone (text or voice) or land line (voice).
- Calls a pre-determined list of up to 10 notification numbers. Use any mix of mobile lines, text numbers and land lines in any sequence.
- An output is available to also connect an external siren or light.
- Set up acknowledgement codes and program the amount of delay before and between notifications.
- Receive detailed alerts from CHORE-TRONICS® 3 Controls. A general alarm message is sent from earlier generations of CHORE-TRONICS® Controls.
- Connect a maximum of 20 CHORE-TRONICS® Controls per BROADCASTER™ Unit.
- Add and name up to eight user-selected alarm inputs (such as house generator, water pressure, door switches, etc.) at each BROADCASTER™ Main and Auxiliary Box, subject to system limitations.

Count on Chore-Time for
experience, reliability,
performance and confidence.

Avoid costly surprises by using Chore-Time's BROADCASTER™ Alert System. Alerts you to alarm notifications and sends the alerts to your mobile phone or land line. Calls a pre-determined list of up to 10 notification numbers.

Join the Satisfied Customers Already Using the BROADCASTER™ System

In this location we are very susceptible to lightning strikes, so anything I can do to mitigate that risk is what I'm going to do. Each house talks to the Broadcaster via fiber optics, so that's one less thing I have to worry about – lightning strikes.

And then the Broadcaster will either text me or call me. I have it on text first, it tells me "alarm house 3 low water pressure." You can see what the problems are instead of just you have a "problem in house 1."

It allows us to expand our operation with fewer people because I can mitigate all the risks and be able to control any of my farms from where I am, either baling hay or at one of my other houses. I can pull out my phone and diagnose the problem and manage my farm remotely.

BROADCASTER™
Main Box

Optional BROADCASTER™
Auxiliary Box

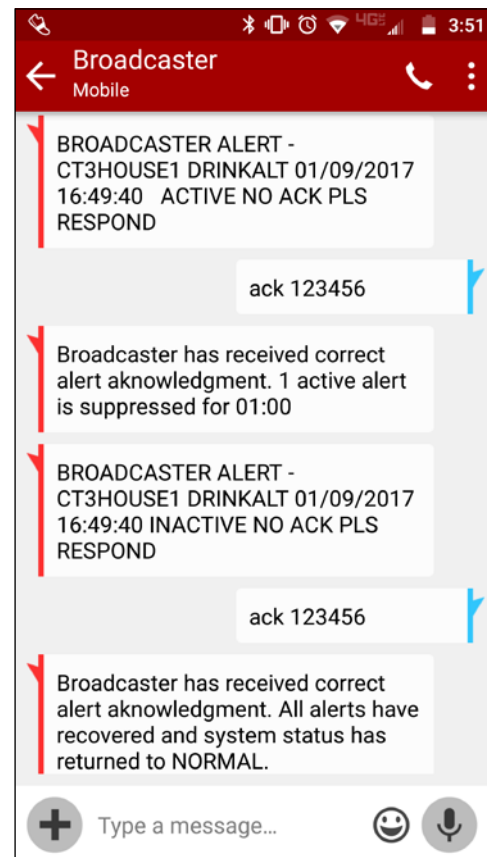

Optional BROADCASTER™
Auxiliary Box

Flexible Connectivity Options

- **Now available with fiber-optic connectivity** for faster communication and less susceptibility to surges and lighting.
- Wireless connectivity for areas where wired connection is not practical.
- Traditional ethernet cable connection with Cat5 cable can also be used for communications as well as auxiliary devices such as cameras, printers, etc.
- Combine any of the above as suitable for the layout of your complex.

Installation Options

- Install one main box per farm of up to 20 houses.
- Directly connect each CHORE-TRONICS® 3 Control to the BROADCASTER™ Main Box.
- For non-CHORE-TRONICS® 3 Controls, connect auxiliary BROADCASTER™ Boxes from each house to the main BROADCASTER™ Box.
- For ancillary alarms, connect through additional auxiliary BROADCASTER™ Boxes (with up to eight inputs per box).
