

CHORE-TRONICS® Monitoring Sensors Offer Extra Management Capabilities

CHORE-TIME®
Let's grow together®

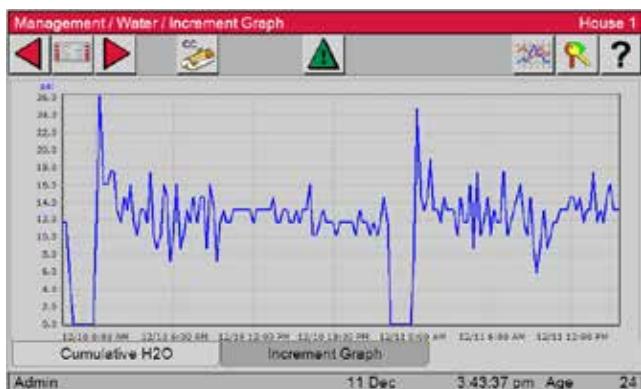

CHORE-TRONICS® Feeder Line Run-Time Monitor

- Can be connected to every feeder line in a house to track daily run time per line and to build a database of information for diagnosing and solving feed distribution problems.
- Use a CHORE-TRONICS® Control with up to 12 run-time monitors to track feeder line operation directly on the Control or remotely using C-CENTRAL™ Software.

Water Consumption Tracking

- Chore-Time's water meter provides accurate daily consumption rates to help in evaluating growth performance and in identifying potential problems.
- Keep track of total water consumption as well as incremental consumption throughout the day.
- Use multiple water meters to track water consumption in various areas in the house and/or to track evaporative cooling system water use.
- Use graphing on your CHORE-TRONICS® Control and C-CENTRAL™ Software to see water consumed every hour and total water consumption.

Cumulative and Incremental Water Consumption Graphs

Chore-Time's Air Speed Meter

- Manage and monitor tunnel fan operation with Chore-Time's Air Speed Meter.
- Dependably measures air flow greater than 125 feet per minute (0.635 m/s).
- Unit is easy to install and low maintenance.

CHORE-TIME® CO₂ Monitor

- Constantly monitor and measure CO₂ levels in the house.
- Measurement range of 0 to 5000 ppm.
- Manually adjust settings based on readings.

- With C-CENTRAL™ Professional Software, user can chart levels throughout the day to make management decisions.
- Replaceable sensor and filter combination.

CHORE-TIME® Humidity Sensor

- Accurately shows current relative humidity as well as minimum and maximum values.
- Helps to keep house conditions at optimum humidity level by adjusting the Minimum Ventilation Timer.
- Coordinates evaporative cooling function with house humidity.
