

# CHORE-TIME

## Programming the CHORE-TIME 4-Group ULTRAFLO Control

Use the following step-by-step procedure to program the CHORE-TIME ULTRAFLO Control Panel. The programming procedure takes one FUNCTION at a time and leads you through the STEPS required to program the necessary information into that function. After each action taken, check the display to see that it shows what is shown in the DISPLAY column of the programming procedure.

It is easy to program the CHORE-TIME ULTRAFLO Control Panel. The control cannot be damaged by pushing the wrong button. Once a program has been entered into the control, the program will not be affected by pushing any of the buttons unless the **CHANGE** button has been pressed first. Even if you should accidentally push the **CHANGE** button and then push another button, only the information in the illuminated function will be changed. That function can be reprogrammed easily. So do not be afraid to try the different buttons to see what they do.

FUNCTION	STEP	DISPLAY
	1 Press <b>TIME OF DAY</b> key 2 Press <b>CHANGE</b> key 3 Press <b>▲</b> / <b>▼</b> keys to set hours 4 Press <b>CHANGE</b> key 5 Press <b>▲</b> / <b>▼</b> keys to set minutes 6 Press <b>ENTER</b> key NOTE: Red dot lit on right side of display indicates P.M.
