

**CHORE-TIME**

# Counter Box Kit

for Egg Collectors

The Counter Boxes are designed to count the eggs that pass through each Egg Tray.

The Egg Tray has factory drilled holes for ease of installation. See the figure, at right, for Installation Instructions.

After the Counter Boxes are installed, run the 18/2 SJO wire from each box to the Collector Control Box. Connect the two wires in the SJO cord to the two leads in the Counter Box (wires are reversible).
