

57" Endura® Fan Installation & Operator's Instruction Manual

Thank You The employees of CTB Inc. would like to thank you for your recent Chore-Time purchase. If a problem should arise, your Chore-Time distributor can supply the necessary information to help you.

Fan Part Numbers and Specifications

Fan Part No.	Bess Lab Test No.	Voltage	Phase	Hz	Nominal RPM	Amps	Starting Amps	Static Pressure at .10" w.c. [25 Pa]		Static Pressure at .15" w.c. [37.5 Pa]	
								CFM [cmh]	CFM/W [cmh/W]	CFM [cmh]	CFM/W [cmh/W]
53464-21	12615	230	1	60	542	6.9	36.0	30400 [51600]	20.4 [34.7]	28400 [48200]	18.1 [30.7]
53464-22	12614	230	1	60	543	5.4	27.5	27100 [46100]	23 [39.1]	25100 [42700]	20.1 [34.2]
53464-41	12616	230	3	60	534	4.8	40.0	30000 [51100]	20.9 [35.6]	27800 [47200]	18.1 [30.8]
53464-42	12619	230	3	60	539	4.1	40.0	26900 [45600]	23.3 [39.6]	24800 [42200]	20.4 [34.6]
53464-51	12617	230	3	50	527	5.2	45.0	29500 [50100]	20.8 [35.3]	27200 [46200]	18.1 [30.8]
53464-52	12618	230	3	50	534	4.7	45.0	26500 [45100]	22.9 [38.9]	24500 [41600]	20.1 [34.1]

Operating static pressure should be less than 0.15 inches water column [37.5 Pa].

The Fan Inlet and exhaust must be kept clear of obstructions. Failure to keep the Fan airflow path clear of obstructions could cause loss of Fan performance and Fan damage.

Safety Information

Carefully read all safety messages in this manual and on your equipment safety signs. Follow recommended precautions and safe operating practices. Keep safety signs in good condition. Replace missing or damaged safety signs.

DANGER: Electrical Hazard

Disconnect electrical power before inspecting or servicing equipment. Ground all electrical equipment for safety. All electrical wiring must be done by a qualified electrician in accordance with local and national electric codes. Ground all non-current carrying metal parts to guard against electrical shock. With the exception of motor overload protection, electrical disconnects and over current protection are not supplied with the equipment.

DANGER: Rotating Fan Blade

Keep Hands away. Disconnect power before servicing. Fan may start automatically. Do not operate the Fan without the screens in place. Disregard to these things will cause serious injury including death.

Warranty

CTB, Inc. ("CTB") warrants new CHORE-TIME ENDURA® Fans ("Product") manufactured by CTB to be free from defects in material or workmanship under normal usage and conditions, for One (1) year from the date of installation by the original purchaser ("Warranty"). CTB provides for an extension of the aforementioned Warranty period ("Extended Warranty Period") with respect to certain Product parts ("Component Part") as set forth in the table below. If such a defect is determined by CTB to exist within the applicable period, CTB will, at its option, (a) repair the Product or Component Part free of charge, F.O.B. the factory of manufacture or (b) replace the Product or Component Part free of charge, F.O.B. the factory of manufacture. This Warranty is not transferable, and applies only to the original purchaser of the Product.

Component Part	Extended Warranty Period
Endura® Fan Cast Aluminum Blades	Lifetime
Endura® Fan Housing and Cones (Including Composite Shrouds, Composite Doors and HDPE Cone Panels)	Five (5) Years

CONDITIONS AND LIMITATIONS

THIS WARRANTY CONSTITUTES CTB'S ENTIRE AND SOLE WARRANTY AND CTB EXPRESSLY DISCLAIMS ANY AND ALL OTHER WARRANTIES, INCLUDING, BUT NOT LIMITED TO, EXPRESS AND IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES AS TO MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSES. CTB shall not be liable for any direct, indirect, incidental, consequential or special damages which any purchaser may suffer or claim to suffer as a result of any defect in the Product. Consequential or Special Damages as used herein include, but are not limited to, lost or damaged products or goods, costs of transportation, lost sales, lost orders, lost income, increased overhead, labor and incidental costs, and operational inefficiencies. Some jurisdictions prohibit limitations on implied warranties and/or the exclusion or limitation of such damages, so these limitations and exclusions may not apply to you. This warranty gives the original purchaser specific legal rights. The original purchaser may also have other rights based upon your specific jurisdiction.

Compliance with federal, state and local rules which apply to the location, installation and use of the Product are the responsibility of the original purchaser, and CTB shall not be liable for any damages which may result from non-compliance with such rules.

The following circumstances shall render this Warranty void:

- "Modifications made to the Product not specifically delineated in the Product manual published by CTB.
- "Product not installed and/or operated in accordance with the instructions published by CTB.
- "All components of the Product are not original equipment supplied by CTB.
- "Product was not purchased from and/or installed by a CTB authorized distributor or certified representative.
- "Product experienced malfunction or failure resulting from misuse, abuse, mismanagement, negligence, alteration, accident, or lack of proper maintenance, or from lightning strikes, electrical power surges or interruption of electricity.
- "Product experienced corrosion, material deterioration and/or equipment malfunction caused by or consistent with the application of chemicals, minerals, sediments or other foreign elements.
- "Product was used for any purpose other than for the care of poultry and livestock.

The Warranty and Extended Warranty may only be modified in writing by an officer of CTB. CTB shall have no obligation or responsibility for any representations or warranties made by or on behalf of any distributor, dealer, agent or certified representative.

* CTB warrants to the original purchaser that certain Component Parts shall be free from defects in material or workmanship under normal usage and conditions, for the duration of the Product's useful lifetime.

Hardware Needed Per Fan (Un-Assembled)

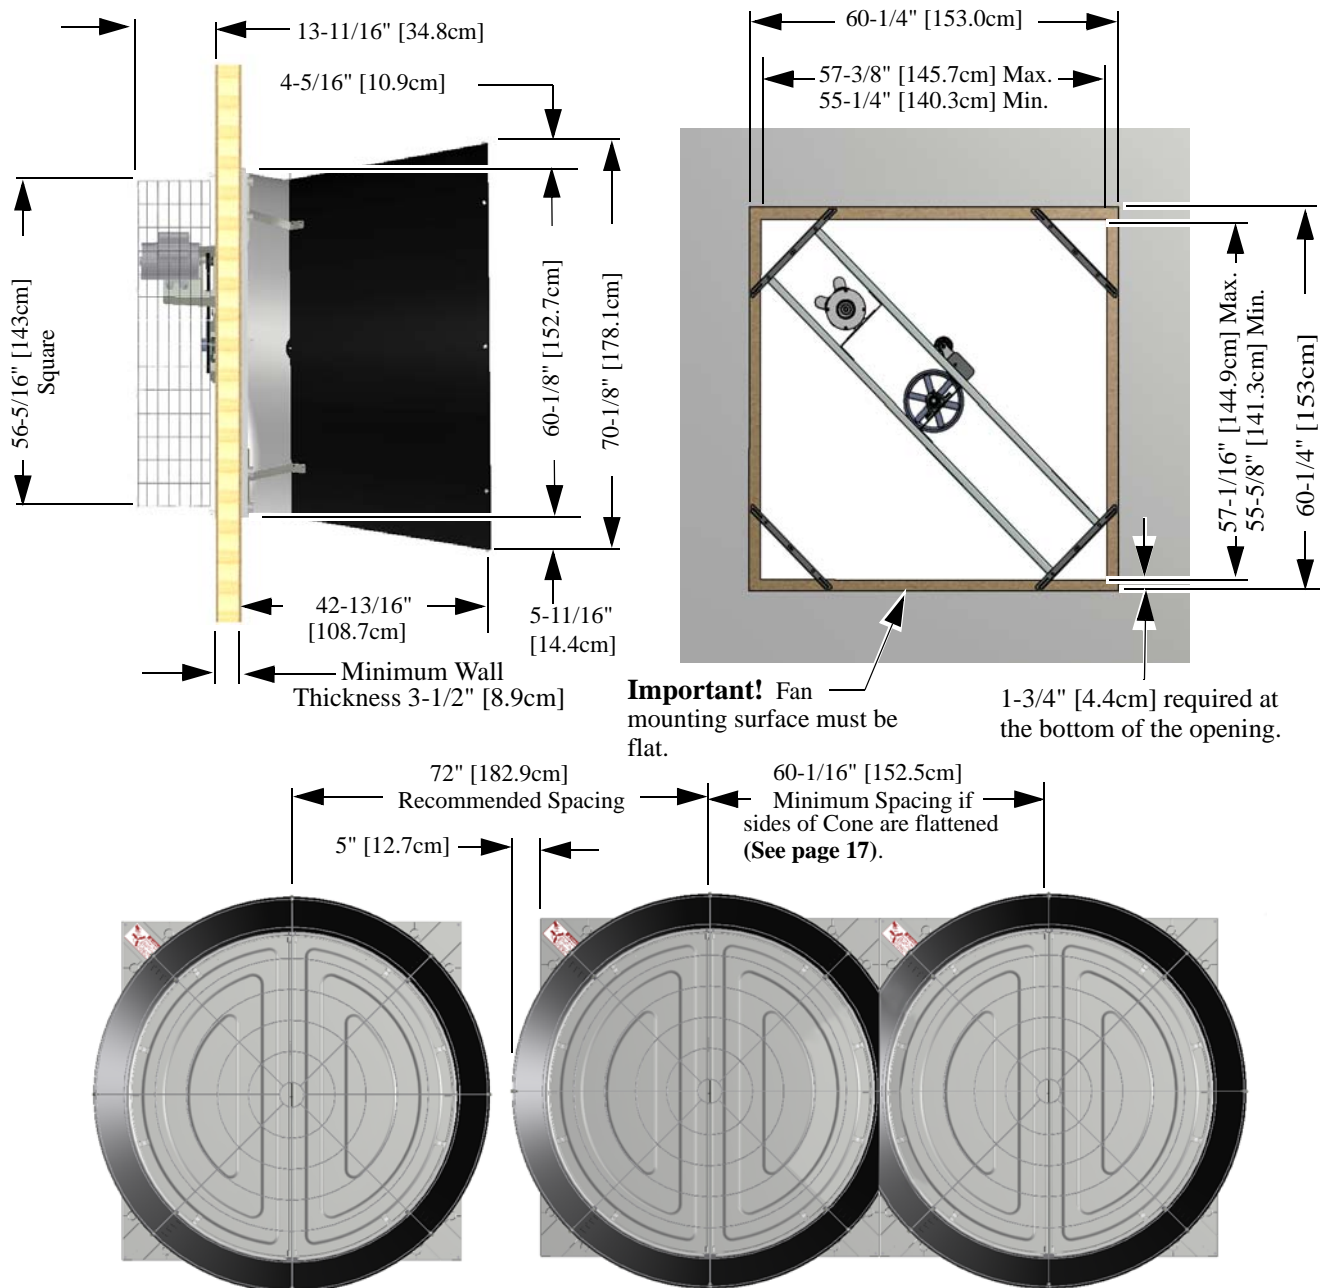

57" Endura® Fan Hardware Items Per Fan Items are Bulk packed in 53788-AAXX (See previous page).			
Item	Qty.	Description	Part No.
1	1	Bottom Pivot Plate	53036
2	1	Top Pivot Plate	53037
3	4	Door Hinge Pin	53038
4	1	1/4 x 1-1-8" Sq. Key (For Blade)	2419-2
5	20	5/16-18 x HHBS Bolt	39-20073
6	56	5/16-18 Hx. Serrated SS Flange Nut	46764
7	20	5/16-18 x .1.0 SS Carriage Bolt	54184
8	2	.38 SS Flat Washer	ST99070
9	1	72.5" Fan Cone Cable	53399
10	1	5/16-18 x 3" Eye Bolt	30663
11	2	Ø1/2" x 11" Door Spring	49629
12	24	1/4-10 x 1-1/2 Lag Screw SS	41561
13	9	Open Eye Hook	1214
14	11	Cable Tie (Includes 3 extra)	48103
15	6	Orifice Frame Bracket	53611
16	2	Cable Clamp	732
17	1	Fan Description Decal	39002-XXX
18	1/3	Anti-Seize Lubricant	47749
19	--	57" Endura® Fan Instruction Manual	MV2406

Tools Needed and Supplies

3/8" socket	1/4" nut driver
1/2" socket or wrench	Motor power cord
Side cutters	Wire nuts / terminals
5/32" allen wrench (unassembled)	Optional screw hook installation tool (CTB part number 13150-1)
	Caulking

New Installation Planning

Planning the layout of the spacing between Fans is very important. Spacing too close together will cause interference between the discharge Cones.

Inspect Shroud Assembly for hardware as it is received

Installation

Rest Fan Shroud on Saw Horses for ease of Assembly

Attaching Fan Posts

Cone Brackets, Corner Brackets (Corners without Posts)

Installing the Drive Assembly and Motor Mount

Hardware
Full Scale

Top and Bottom Pivot Plates and Eyebolt, Door Stop Cable

(53037)
Top Pivot Plate

(46764)

(30663)
Eyebolt

(53036)

Bottom Pivot Plate

(46764) 5/16 Flg. Nut

Insert (53399) Door Stop Cable
Assembly into Top Pivot Plate

Bottom Shelf Installation

Attaching the Fan to the Wall

Eyebolt indicates the **Top** of the Fan.

It is important when attaching the Fan to the Wall to keep edges of Shroud straight.

Keep Edges of Shroud Straight. **Do not** allow Shroud to bow inward.

Pre-drill holes to 3/16" [4.8 mm] to avoid splitting lumber. If holes do not line up with the lumber it may be necessary to put Screws through Shroud. **Important!** Attach the Fan to the Wall with 1/4 x 1-1/2" Lag Screws (41561) in the specific order shown. Attach with a **total of 20 Lag Screws**.

Use the Hole in the Corner Bracket that is centered with Lumber to avoid splitting.

(41561) 1/4 x 1-1/2 Lag Screw

Cone Assembly

Assemble Cone Panels as shown below.

Installing the Orifice Frame

Rounded Tab on the Cone

Important! Line up the Seam in the Orifice Frame with one of the rounded Tabs on the Cone.

Cone Installation

Hang the Cone on the Eye-Bolt extruding from the top of the Shroud using the hole in the Cone as shown.

Attach the cone to the Shroud as shown below.

Door Assembly and Installation

Insert Door Pins in both Doors as shown.
Push Pins in until they bottom out.

Doors are Left and Right specific.

Insert Door Pins into Bottom Pivot Plate.

Grab the Door in the Center, Bow the Door, and insert the Top Door Pin into the Top Pivot Bracket as shown.
Do not Overbow the Doors!

Top Pivot Plate

Grill Installation

Install the Fan Cone Grill (as shown). Attach the end of the Door Stop Cable to the bottom Grill Leg as shown.

If it is desired to Mount Fans at the minimum spacing cutting the Grills is required as shown.

Motor Installation

Attach Motor to Z-Bracket.

Belt Installation

Blade Installation

Fan Blade Flush
with the End of Shaft.

Torque Blade Set Screws
to 290 - 300 IN LBS.
[32.7-33.9 NM]

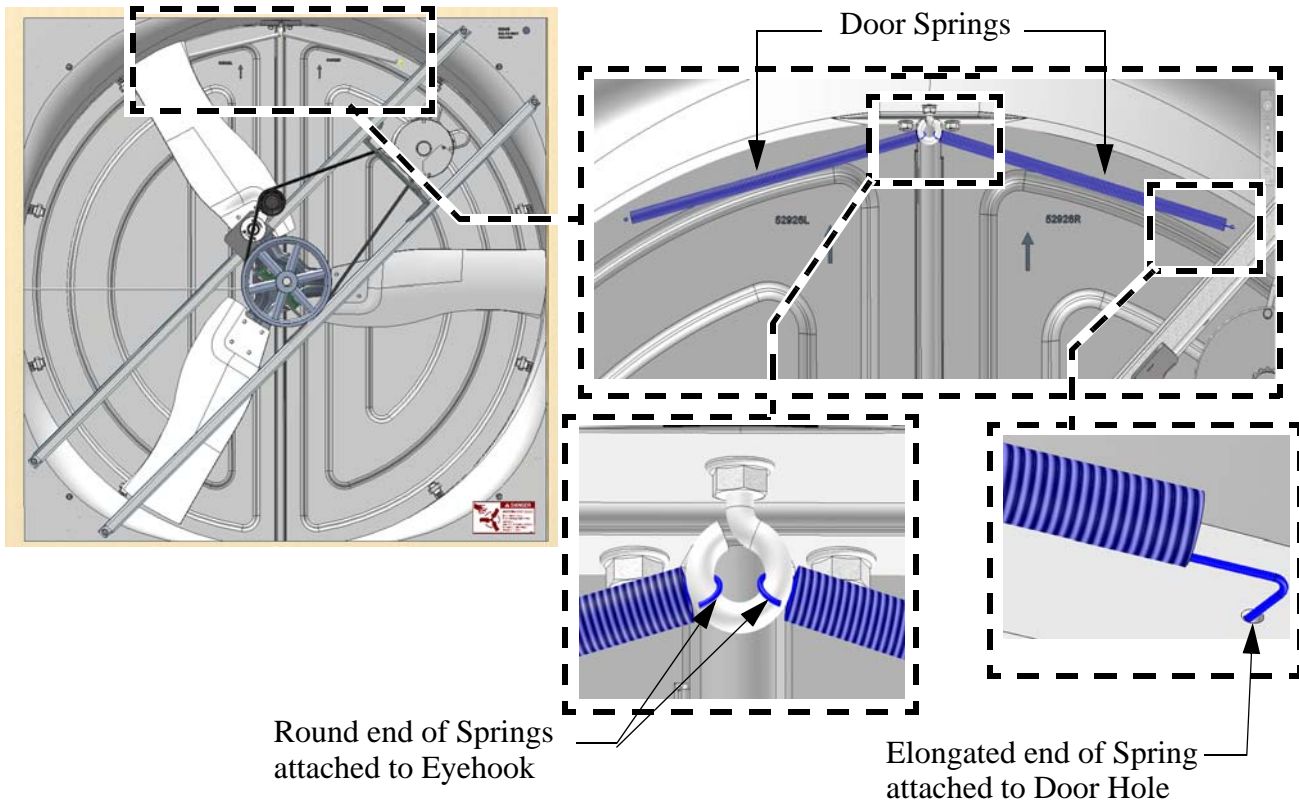

Spin the Blade by hand and check that there is minimum of $\frac{1}{8}$ " [3 mm] Clearance from the Shroud all the way around orifice.

If Clearance is insufficient, check that the mounting surface is flat, and that the sides of the Shroud are straight. To Gain more Tip Clearance, remove the Lag Screws from the side with inadequate clearance, push out on the Shroud orifice and re-install Lag Screws in new holes.

Door Spring Installation

Caulking

Caulk both Ends of the Bottom Shelf and as needed to fill any gaps between the Shroud and the Framed opening.

Motor Wiring

1. Check that the electrical power being supplied to the Fan matches the electrical Specifications on the Fan and Motor Decals.
2. Remove the Motor Access Cover.
3. Install an electrical disconnect within reach of each Fan installed.
4. Connect the cord to the motor according to the wiring diagram on the motor. Verify that the motor is connected for counter clockwise rotation (viewing the back of the motor, opposite the shaft end.)
5. Follow local, state, and national electrical codes for wiring.
6. Attach the Cord to the Wall using a Screwhook **as shown**. Allow enough slack in the cord to form a "drip loop" for moisture to fall away from the cord and not into the motor.

Motor Access Cover — Drip Loop

Screen Assembly and Installation

Use two Nylon Cable Ties per Corner in the locations **shown below**. Trim off excess Cable tie. (**Cable ties shown before being cut off for clarity**).

Test Fan for proper operation.

Plug the Fan in and test for proper operation

Maintenance

IMPORTANT! Disconnect Power Prior To Maintaining Or Cleaning The Fan. The fan may start automatically causing serious injury or death.

- Service and repair of fans should be done only by a qualified technician.
- Minimize contact of moisture or corrosive chemicals to the surfaces of the fan components to maximize fan life.
- After washing fans, operate fans long enough to remove moisture from all fan surfaces.
- Keep the fan clean for maximum life and best performance. **Do Not spray water on the Fan Shaft Bearings, the Belt Tensioner, or the Motor.**
- Periodically check the V-Belt and replace if necessary. A worn Belt will cause a substantial drop in Fan performance or it can break and cause Fan failure. If a Belt rides below the Sheave edge, replace the belt. (See below)

1747-054 04/03

Good Belt

Bad Belt

Bad Belt (Needs Replaced)

- Check Belt Tension. The Belt should be tensioned just tight enough to minimize Belt slippage. Over tensioning the belt will cause premature Belt and Bearing wear. With a new Belt the Idler Sheave indicator mark should line up with the Second notch in the Tensioner Housing as shown.

- The motor and Fan Shaft Bearings are pre-lubricated. Grease zerks are provided on the fan shaft bearings for installations where re-lubrication is needed. Add only a small amount of grease to purge impurities out of the bearing seals. Use only high quality lithium soap base grease and clean all dirt from zerk before applying grease. Chore-Time recommends using Shell Alvania # 2 in the fan shaft bearings.
- Check Sheaves for wear. Replace if a Sheave groove is worn.

Good Sheave

1747-053 04/03

Bad Sheave

Bad Sheave (Needs Replaced)
