

K-Valve Inlet Instruction

Important: No more than two cage tiers per Pressure Regulator. Make sure the Pressure Regulator is mounted high on the upper tier of the two cage tiers that it is to regulate. For cage rows over 600 feet long use one regulator per tier.

Important: A shut-off valve MUST be installed below each pressure gauge. Close shut-off valve during high-pressure flushing.

Note: The original, authoritative version of this manual is the English version produced by CTB, Inc. or any of its subsidiaries or divisions, (hereafter collectively referred to as "CTB"). Subsequent changes to any manual made by any third party have not been reviewed nor authenticated by CTB. Such changes may include, but are not limited to, translation into languages other than English, and additions to or deletions from the original content. CTB disclaims responsibility for any and all damages, injuries, warranty claims and/or any other claims associated with such changes, inasmuch as such changes result in content that is different from the authoritative CTB-published English version of the manual. For current product installation and operation information, please contact the customer service and/or technical service departments of the appropriate CTB subsidiary or division. Should you observe any questionable content in any manual, please notify CTB immediately in writing to: CTB Legal Department, P.O. Box 2000, Milford, IN 46542-2000 U.S.A.
