

KONAVI® Broiler Feeder

A Breakthrough in Clean, Open-Style Feeding

Patented (Additional Patents Pending)

The KONAVI® Feeder gives birds easy access to feed without stepping in it.

Introducing the Broiler Feeder that Lets Beaks In, but Keeps Feet Out

The KONAVI® Feeding System features a streamlined, open design that gives birds easy access to feed for fast gains and consistent performance. Plus, its angled cone with anti-rake fins discourages birds from standing in the feeders. The result is cleaner, healthier feed that keeps birds eating and prevents feed waste.

Count on Chore-Time for experience, reliability, performance and confidence.

Designed for Global Poultry Production

Chore-Time engineers designed the KONAVI® Feeder from the ground up to meet the needs of global feeding practices and houses where minimal or no litter is used. With an ultra-low pan height, it lets the smallest chicks reach the feed even when they are not boosted by the height of the litter. Its simple design also works well in a wide variety of traditional broiler production environments.

Count On It

Chore-Time has been a leader in poultry and egg production systems since 1952. We have the experience to deliver complete solutions for feeding, feed handling, drinking, egg handling, climate control and management systems. You can count on Chore-Time and your independent Chore-Time distributor for equipment reliability, production performance and ultimate confidence.

KONAVI® Broiler Feeder

Lets Beaks In. Keeps Feet Out.

Maximum Feed Access

With its low pan height and patented scalloped edge, the Chore-Time KONAVI® Feeder invites chicks to eat from the outside of the pan from day one. It gives birds comfortable, easy access to feed throughout their growth cycle. With the KONAVI® Feeder, you can flood pans high to attract day-old chicks, and then use one of three grow-out settings for finishing birds.

Minimum Feed Waste

The KONAVI® Pan features a unique angled cone with anti-rake fins that discourages birds from stepping into the feeder and scratching feed out of the pan with their feet or beaks. It helps keep feed clean and uncontaminated – improving feed availability and feed efficiency.

Complete Cleaning

The simple, streamlined design of the KONAVI® Feeder, with no corners or pockets to trap feed, permits more complete cleaning of the feeder. There are no grills to work around. Simply power wash KONAVI® Feeders between flocks for better bird health.

Durable Construction

- Made using heavy-duty, durable plastic.
- Engineered to resist the effects of ultraviolet light.
- Eating area of the pan is thicker for long life – 0.15 inches (3.8 mm).

Addresses Today's Emerging Health Concerns

Birds naturally tend to eat from outside of the KONAVI® Feeder. The benefit is reduced feed contamination. Young birds may climb up on the feeder, but they typically do not stay there long. Most importantly, they are inclined to face inward toward the feed so most droppings fall outside the pan.

Feeder Dimensions

Pan diameter	13.06 inches (332 mm)
Pan height at lowest point	1.93 inches (49 mm)
Eating spaces	14

Three Days Old

39 Days Old

Adolescent birds may still climb inside grilled feeders. They block access to feed for other birds and contaminate the feed with their droppings.

11 Days Old
