

## 57" Flush Mount Direct Drive Endura<sup>®</sup> Fan

56911-X					
Fan	Bess Lab Test*	Phase	Voltage	Hz	Full Speed RPM
56911-1	21079	1	230	60	630
56911-2	21080	3	230	60	630
56911-3	20436	3	380	50	630

\*Bess Lab test data available at <http://bess.illinois.edu/type.asp>

Operating static pressure should be less than 0.25 inches water column [62 Pa].

**The fan inlet and exhaust must be kept clear of obstructions. Failure to keep the fan air-flow path clear of obstructions could cause loss of fan performance and fan damage.**

# Safety

## Warning

**This product has inherent dangers, which can cause damage or loss to persons or equipment if the warnings in this manual are not adhered to. Please read and follow all instructions.**

## Personnel Requirements

**This product must only be used by persons adequately trained in the hazards, dangers, and risks of the equipment.**

All users of this product must be trained in the following areas:

- Health and safety hazards relating to use of this machine throughout its entire life cycle
- Devices provided for safety of the operator
- Instructions for safe shutdown in case of emergency

The employer must assume the following responsibilities:

- To provide necessary personal protective equipment required
- To ensure normal maintenance operations are carried out
- To provide necessary repair parts in a timely manner

## General Requirements

Safety devices must remain in good working condition and may not be bypassed or rendered ineffective. The fan must not be operated with guards removed. All maintenance work must be done with electrical power isolated from the machine via proper device in accordance with local and national laws. The user must ensure that the environmental and electrical supply conditions in which the fan operates are within the limits specified in this manual or on product labels. Modification to this machine in any way are prohibited unless given written consent by CTB, Inc. Unauthorized modifications will render the warranty void and can lead to hazardous situations.

## Safety Devices

This machine has been designed to operate with fixed guards in order to protect users from physical hazards on both inlet and outlet sides of this fan. They were designed in accordance with national standards. They must not be altered. They must remain in their fixings at all times of operation. If damage or destruction should occur, exact replacements should be fitted immediately. **Reference the technical documentation section at the back of this manual** for more information.

At the time of installation, a proper device should be fitted in the direct vicinity of the fan to act as an emergency stop device. This device must be supplied by the installer. The device must be of a type to satisfy the emergency stop device requirements below.

EN-IEC 60204-1    Section 10.7.2:

- a push-button operated switch with a palm or mushroom head type

Section 10.7.3:

- actuators of emergency stop devices shall be colored RED.

## Residual Risks

Despite the level of caution taken and the incorporation of safeguards, some risks will remain. This product has the following hazards:

Hazard	Safeguard	Operator Requirement
Cutting or trapping Ejection of parts	Fixed guards	Maintain all fixed guards in proper location and good condition
Stability	Design Installation Instructions	Maintain product in good operating condition according to manual
Electrical shock	Warning Labels Installation Instructions	Maintain hazard decals in good readable condition Install and operate in accordance with instruction in manual
Noise	Design	Wear hearing protection if in vicinity of product for extended time periods
Transport and Handling	Instructions	Reference manual for precautions to take during transport or handling of this product

## Follow Safety Instructions

Carefully read all safety messages in this manual and on your equipment safety signs. Follow recommended precautions and safe operating practices.

Keep safety signs in good condition. Replace missing or damaged safety signs.

## Limited Warranty

Chore-Time Group, a division of CTB, Inc. ("Chore-Time") warrants new CHORE-TIME Endura® Fans manufactured by Chore-Time to be free from defects in material or workmanship under normal usage and conditions, for One (1) year from the date of installation by the original purchaser ("Warranty"). Chore-Time provides for an extension of the aforementioned Warranty period ("Extended Warranty Period") with respect to certain Product parts ("Component Part") as set forth in the table below. If such a defect is determined by Chore-Time to exist within the applicable period, Chore-Time will, at its option, (a) repair the Product or Component Part free of charge, F.O.B. the factory of manufacture or (b) replace the Product or Component Part free of charge, F.O.B. the factory of manufacture. This Warranty is not transferable, and applies only to the original purchaser of the Product.

Component Part	Extended Warranty Period
Endura® Fan Housing and Cones (Including Composite Shrouds, Composite Doors and HDPE Cone Panels)	Five (5) Years

### CONDITIONS AND LIMITATIONS

THIS WARRANTY CONSTITUTES CHORE-TIME'S ENTIRE AND SOLE WARRANTY AND CHORE-TIME EXPRESSLY DISCLAIMS ANY AND ALL OTHER WARRANTIES, INCLUDING, BUT NOT LIMITED TO, EXPRESS AND IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES AS TO MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSES. CHORE-TIME shall not be liable for any direct, indirect, incidental, consequential or special damages which any purchaser may suffer or claim to suffer as a result of any defect in the Product. Consequential or Special Damages as used herein include, but are not limited to, lost or damaged products or goods, costs of transportation, lost sales, lost orders, lost income, increased overhead, labor and incidental costs, and operational inefficiencies. *Some jurisdictions prohibit limitations on implied warranties and/or the exclusion or limitation of such damages, so these limitations and exclusions may not apply to you. This warranty gives the original purchaser specific legal rights. You may also have other rights based upon your specific jurisdiction.*

Compliance with federal, state and local rules which apply to the location, installation and use of the Product are the responsibility of the original purchaser, and CHORE-TIME shall not be liable for any damages which may result from non-compliance with such rules.

The following circumstances shall render this Warranty void:

- Modifications made to the Product not specifically delineated in the Product manual.
- Product not installed and/or operated in accordance with the instructions published by the CHORE-TIME.
- All components of the Product are not original equipment supplied by CHORE-TIME.
- Product was not purchased from and/or installed by a CHORE-TIME authorized distributor or certified representative.
- Product experienced malfunction or failure resulting from misuse, abuse, mismanagement, negligence, alteration, accident, or lack of proper maintenance, or from lightning strikes, electrical power surges or interruption of electricity.
- Product experienced corrosion, material deterioration and/or equipment malfunction caused by or consistent with the application of chemicals, minerals, sediments or other foreign elements.
- Product was used for any purpose other than for the care of poultry and livestock.

The Warranty and Extended Warranty may only be modified in writing by an officer of CHORE-TIME. CHORE-TIME shall have no obligation or responsibility for any representations or warranties made by or on behalf of any distributor, dealer, agent or certified representative.

56541-3-X	ODE-3-140041-3F1A

## Endura® DD Flush Mount Fan New Installation Planning

Planning the layout of the spacing between Fans is very important. Spacing too close together will cause interference between the discharge Cones. See the Invertek ODE-3 IP66 Outdoor User Guide, (MV2493) at [www.choretimetime.com/documents\\_Manuals\\_Ventilation\\_Fans\\_Shutters\\_57-Inch\\_Endura\\_Fans\\_MV2493](http://www.choretimetime.com/documents_Manuals_Ventilation_Fans_Shutters_57-Inch_Endura_Fans_MV2493) for additional drive mounting requirements.

### Outside the Wall Installation

**Important!**  
Fan Mounting  
Surface must be  
Flat.

Outside Wall

## Spacing

Planning the layout of the spacing between fans is very important. Spacing too close together will cause interference between the discharge cones.

## Installation

### Inspecting the Shroud

Inspect the Shroud assembly for hardware as received.

## Assembling the Extension Housing

Step 1: Set the panels in the framed opening as shown.

**Step 2:** Use four Self Tapping Screws (54683) to Fasten the Panels together using the holes provided toward the outside of the house **as shown**. Other four Screws will be installed after squaring.

(54683) 1/4-20 x 1/2" Screw

**Step 3:** Center the Bottom Panel and fasten to the wall with Screen Clip Washers (56671) and 1/4-10 x 1-1/2" Lag Screws (41561) **as shown**. Angle Lags away from Fan to allow for easier removal of Screen later. Do not tighten down the Lag Screws at the Washer locations at this time. They will be tightened later when the Screen is installed.

(41561) 1/4-10 x 1-1/2" Lag Screw

(56671) Screen Clip Washer

Shown with  
Screen Installed  
for reference  
only.

Top View

(56671)

(41561)

Lag Slightly  
Angled

**Step 4:** Use a Level to level the Side Panels and attach them to the Wall with Screen Clip Washers (56671) and 1/4-10 x 1-1/2" Lag Screws (41561) as shown. Angle Lag Screws away from Fan as shown on the previous page. **Do not** tighten down the Lag Screws at the Washer locations at this time. They will be tightened later when the Screen is installed.

**Step 5:** Use four Self Tapping Screws (54683) to finish fastening the Panels together. Install a Nylon Cord Clip (565) in the top corner nearest where the VFD Control will be mounted as shown. See “Fan Drive (VFD) Mounting” on page 19.

## Attaching the Fan to the Extension Housing

**Step 1:** Set the Fan on the Bottom Panel Shelf **as shown**.

**Step 2:** Attach the Shroud to the Extension Box Panels with 20x 1/4-20 x 7/8" SS Bolts (4404-17) and 1/4-20 Flange Nuts (46298) **as shown**.

## Cone Assembly

Assemble Cone Panels as shown below.

## Installing the Orifice Frame

Rounded Tab on the Cone

**Important!** Line up the Seam in the Orifice Frame with one of the rounded Tabs on the Cone.

**Orifice Frame Shown Gray for Clarity.**

(46764) 5/16 Flg. Nut

(54287) 5/16-18 x 1.00  
SS Shldr. Bolt

## Cone Installation

**Important!** Before installing a Cone on assembled fan models do either **A or B** below.

**A: Remove the Doors (Below):** To remove the Doors Pull near the center of the Door to allow the Door Pins to slide out of the top Door Pivot Bracket. Once the Door is clear of the Top Pivot Bracket lift it from the Bottom Pivot Plate and set aside somewhere safe to be reinstalled later.

the Top Pivot Bracket lift it from the Bottom Pivot Plate and set aside somewhere safe to be reinstalled later.

**B: Clamp the Doors (Below)**

## Cone Installation

**Step 1:** Hang the Cone on the Eye-Bolt extruding from the top of the Shroud using the hole in the Cone as shown.

**Step 2:** Attach the Cone to the Shroud with 5/16 Flg. Nuts (46764) as shown

## Re-install Doors

Insert Door Pins into Bottom Pivot Plate.

Grab the Door in the center, bow the Door outward, and insert the Top Door Pin in the Top Pivot Bracket as shown. **Do not Overbow the Doors!**

## Grill Installation

Install the Fan Cone Grill (as shown). Attach the end of the Door Stop Cable to the bottom Grill Leg **as shown**.

If it is desired to Mount Fans at the minimum spacing cutting the Grills is required **as shown**.

## Fan Drive (VFD) Mounting

Select a location next to the Fan to install the Fan Drive. See the Invertek VFD Quick Start Guide (MV2492) that comes with the drive, or online at [www.choretimetime.com/documents\\_Manuals\\_Ventilation\\_Fans\\_Shutters\\_57\\_Endura\\_Fans\\_MV2492](http://www.choretimetime.com/documents_Manuals_Ventilation_Fans_Shutters_57_Endura_Fans_MV2492). See the Invertek User Manual (MV2493) at [www.choretimetime.com/documents\\_Manuals\\_Ventilation\\_Fans\\_Shutters\\_57-Inch\\_Endura\\_Fans\\_MV2493](http://www.choretimetime.com/documents_Manuals_Ventilation_Fans_Shutters_57-Inch_Endura_Fans_MV2493) for mounting details and general wiring instructions.

## Screen Installation

Center Screen on the wall opening. Loosen the Lag Screws enough to allow the Screen to be captured by the Screen Clip Washers and Rotate them **as shown**. Tighten down the Lags to Secure Fan and Screen to the Wall.

## Control Signal Wiring

See the Invertek Quick Start Guide that comes packaged with the VFD for VFD wiring instructions. Further information is also available in the Invertek ODE-3 IP66 Outdoor User Guide (MV2493). It can be viewed online at [www.choretimetime.com/documents, Manuals, Ventilation, Fans & Shutters, 57-Inch Endura Fans, MV2493](http://www.choretimetime.com/documents, Manuals, Ventilation, Fans & Shutters, 57-Inch Endura Fans, MV2493). For variable speed fan control connect the 0-10 vdc analog signal from the main control to VFD terminals 6 (positive) and 7. The Fan will run full speed with an analog signal of 10 vdc and slow down to a stop as the signal is decreased to 0 vdc.

For optional Fan Backup Control, in case of main control failure, connect a backup relay to terminals 1 and 4. The Fan will run full speed when the backup relay contacts are closed.

The jumper from terminals 1 to 2 is required for Fan operation.

Backup Box Relay (Optional)

## Drive Parameters

The Drives come pre-programmed with parameters for operation with the corresponding 57" Direct Drive Endura Fans. The following parameter have been changed from the drive default values:

**Note:** If the length of the Cord between the Drive and the Drive Motor is changed from the standard Cord supplied with the Fan/Motor then the P-52 Autotune process needs to be done with the Motor at room temperature to update the Motor resistance P-55. See the Invertek Quick Start Guide (MV2492) that comes with vfd for instructions."

No.	Defaults	Description	Parameter Sets*	
			-1	-2
P-01	60	Maximum Frequency/Speed Limit (rpm)	630	630
P-03	5	Acceleration Ramp Time (sec)	3	3
P-04	5	Deceleration Ramp Time (sec)	40	40
P-05	0	Stop Mode Select	4	4
P-06	0	Energy Optimiser	1	1
P-07	230	Motor Rated Voltage	170	303
P-09	60	Motor Rated Frequency (Hz)	42	42
P-10	0	Motor Rated Speed (rpm)	630	630
P-13	0	Industrial / Fan-Pump Control Mode	2	2
P-14	0	Extended Menu Access Code	201	201
P-30	Edge-r	Terminal Mode Restart Function	Auto-5	Auto-5
P-33	0	Spin Start Enable	1	1
P-48	0.0	Standby Activation Delay Time (sec)	0.1	0.1
P-51	0	Motor Control Mode	2	2
P-54	150	Maximum Current Limit	110	110
P-55	1.40	Motor Stator Resistance	3.4	9.8
P-56	120	Motor Stator d-axis Inductance (Lsd)	25	57
P-57	12.0	Motor Stator q-axis Inductance (Lsq)	26	55.7
P-60	o 0	Thermal Overload Management	o 1	o 1

\*Last digits of the 56541 Programmed VFD Part Numbers are the Parameter Set numbers, ie "-2" parameter set is used in the 56541-3-2 VFD

## Test Fan for proper operation

Supply power to the VFD and check for proper operation. If the Fan turns in the wrong direction interchange any two wire connections between the drive and the motor to correct the direction of fan blade rotation.

## Maintenance

**IMPORTANT!** Disconnect Power Prior To Maintaining Or Cleaning The Fan. The fan may start automatically causing serious injury or death.

- Service and repair of fans should be done only by a qualified technician.
- Minimize contact of moisture or corrosive chemicals to the surfaces of the fan components to maximize fan life.
- After washing fans, operate fans long enough to remove moisture from all fan surfaces.
- Keep the fan clean for maximum life and best performance.
